

Topcoat Anti Slip Hard Wearing Anti-Slip Epoxy Resin Floor Screed

Topcoat Anti Slip system is a hard wearing anti-slip Epoxy resin floor screed suitable for use in wet areas. It is seamless, easy to clean and comes in a large range of colours.

The system consists of four steps:

- Concrete sub floor is prepared by dust free shot blasting or diamond grinding.
- Epoxy high penetration Primer 2000 is applied.
- While primer is still wet the surface is blinded with Quartz aggregate size
0.1 – 0.3 mm for light anti-slip
0.2 – 0.6 mm for medium anti-slip
0.3 – 0.8 mm is used for heavy duty applications such as car park ramps.
- Epoxy screed Topcoat 2000 is applied using a squeegee followed by back rolling.

Applications: Car parks, Fire stations, Workshops, Processing areas, Corridors, Laboratory areas, Warehouses, etc.

Screed Colours: Battleship Grey (dark Grey), Gunmetal Grey (light Grey), Leaf Green, Marine Blue, Sky Blue, Honey Yellow, Sand Yellow, Tomato Red, Tile Red

Conforms to British Slip Resistance Standard No. BS903: Part A26 under both wet and dry conditions.
